

Excellent Performance – Axles

16T Double reduction rear axle

Rear axle stabilizer

Enhanced 9T front axle

- **Enhanced 9T axle** could carry more weight with greater stability.
- **Double reduction 16-T middle and rear axle** with casting steel housing, are enforced to be adopted to the very tough road and heavy load conditions.
- **Rear axle stabilizer** standard for enhancing driving stability in hilly area, or road with a lot of ups and downs, keeping the axle and frame at a relatively stable position with each other.
